

Grace Ediae

Grace Ediae received her Master of Science in Genetic Counselling at McGill University in May 2022 and completed her Honours Bachelor of Science in Biomedical Science at the University of Ottawa in 2017. Prior to starting her Master's program, she worked at the Children's Hospital of Eastern Ontario Research Institute and Genetics Department. She began volunteering as a genetic counselling assistant which evolved into over 5 years of experience working with various team members and on different research projects within the department. Most notably, she was a key member of an internationally renowned translational research program, Care4Rare Canada; a program focused on the advancement of rare disease research. She continued her interest in rare disease through her Master's independent studies project – 'ThinkRare'. Currently she occupies the position of Genetic Counsellor for the ATLAS program under the Institute for Precision Health at the University of California, Los Angeles.
