

Ann-Marie Peturson

Ann grew up in Red Deer, Alberta and completed her undergraduate degree in Molecular Genetics at the University of Alberta in 2019. She has worked as a Genetics Assistant with the Newborn Screening Laboratory and the Ocular Genetics department in Edmonton, Alberta. Ann recently completed her Master of Science degree in Genetic Counselling at the University of British Columbia in April 2022. During the program, she worked with the Translational Psychiatric Genetics Group for her directed studies project focused on patient outcomes of psychiatric genetic counselling.

Ann is currently working as a Clinical Genetic Counsellor, providing counselling for prenatal and general genetics cases, with the Provincial Medical Genetics Program in Vancouver, BC."
