

Sadia Chowdhury

Sadia is entering her second year of the MSc Program in Genetic Counselling at the University of Toronto. Her research project is focused on the impact of the COVID-19 pandemic on genetic counselling student supervision: a supervisor's perspective.

Before starting her MSc, Sadia completed her BSc in Biomedical Sciences at Toronto Metropolitan University. As an undergraduate student, she had the amazing opportunity to assist with research related to psychology as an NSERC USRA summer student as well as research related to nutritional sciences as a Banting and Best Diabetes Centre summer student. She developed support skills through volunteering as a crisis responder for the Distress Centres of Greater Toronto as well as Kids Help Phone's Crisis Text Line. She has also been a counsellor for various camps, mentor for various youth and a math, science and literacy tutor for students of all ages. In her spare time, she loves to hike or do anything active. She is also a big Toronto Maple Leafs fan most of the time.
