

Angela Krutish

Angela Krutish holds a BSc (Hons) in Genetics, an MSc in Biochemistry and Medical Genetics, and an MSc in Genetic Counselling from the University of Manitoba. Angela currently works at the University of Manitoba as the Project Manager for the “Canadian Prairie Metabolic Network”, a research study exploring an “OMICS First” approach to diagnosing inborn errors of metabolism. Prior to her role at the CPMN, Angela worked as a clinical genetic counsellor in Thunder Bay, Ontario. Angela’s primary research interest is alternative practice models that can improve access to genetics services. In her spare time, Angela enjoys reading, cooking, playing pinball, and spending time with her family and 3 dogs.
